*Xbox Live:* StatisticsNinja

*Phone:* (580) 678-5630  
*Personal:* [rcfoster@gmail.com](mailto:rcfoster@gmail.com)

Ph.D. statistician with a strong applied background in the physical sciences and engineering, and experience in research for the social sciences.

### RESEARCH INTERESTS

My research interests are novel statistical methods and technologies, and the intersection of Bayesian and frequentist statistics.

### EDUCATION

#### **Ph.D. in Statistics**

**Iowa State University**, Ames, IA, October 2016

- Thesis title: [Topics in Empirical Bayesian Analysis](#)
- Adviser: Mark S. Kaiser
- 3.65 GPA

#### **M.S. in Statistics**

**Iowa State University**, Ames, IA, December 2010

- Thesis title: [Simulation Analysis of a Bayesian Test Plan for Sequential Data from a Homogeneous Poisson Process](#)
- Adviser: Alyson Wilson
- 3.65 GPA

#### **B.S. in Mathematics and Statistics**

**Oklahoma State University**, Stillwater, OK, May 2007

- Summa cum laude
- Minor in Computer Science
- 3.948 GPA
- Honors college degree

### EXPERIENCE

**Bettis Atomic Power Laboratory**, Pittsburgh, PA  
Naval Nuclear Laboratory, Statistics and Irradiation group

Scientist, Feb. 2020 - Present

- Provide statistical support to the Navy in its mission to produce safe nuclear power for the fleet and serve as instructor in basic and advanced statistical topics for Bettis Reactor Engineering School students and Naval Nuclear Laboratory employees.

**Los Alamos National Laboratory**, Los Alamos, NM  
CCS-6, Statistical Sciences group

Postdoctoral Researcher, Oct. 2016 - Oct. 2019

- Utilized applied statistical skills to perform research in multiple topics, including sources of uncertainty for computation techniques that lie “Beyond Moore’s Law” and the statistical properties of resulting errors from propagation of BML uncertainties, simulation of microstructures from samples of additively manufactured materials, and applications of quantum computing in statistics. Additional projects on modeling measurements of earth’s magnetic field using geospatial statistical techniques and modeling solutions of differential equations probabilistically

**Iowa State University**, Ames, IA  
Department of statistics

Research Assistant, 2007-2010

- Engaged in multiple consultation projects with various departments and research groups at Iowa State University, including animal science and the agriculture experiment station (AES).
